OS/2 Warp: The **Hottest** Java Around!

OS/2 Warp is developing into a strong and speedy foundation for Java. This perfect fit is nicely symbolized by "Carmen" the two-sided coffee cup by dutch ceramist Erik-Jan Kwakkel on the cover page.

There's Much **More** Than We Can Show

This catalogue offers a large selection of software for OS/2. But we have more on offer than we can show here. Don't hesitate to call us if you need information about products which are not presented here. Or check out our web site: www.xeu.com/blueware/

Large Volume Licencing: **Deep** **Discounts!**

We can offer your company deep discounts on IBM and Lotus volume license purchases with the **IBM Software Advantage Program** and the **Lotus Passport Program**. Call us for more information.

Products and other information are subject to change without notice. We cannot be held responsible for typesetting errors and errata information which may unintentionally have slipped in.

It's Java Time

Just when you thought that OS/2 was on its way back, it is receiving a strong infusion from Java and the internet.

As Dr. Michael Cowpland, president and CEO of Corel Corporation put it: "This platform is indeed one of the best operating system solutions in which to run **Corel Office for Java** (<http://officeforjava.corel.com/>), a suite of applications that is setting the standard for Java-based office suites, and marks another milestone in the evolution of Java as a whole."

The **OS/2 Warp 4.0** Java implementation was recently updated with a better Virtual Machine (VM) and a speedy Just In Time (JIT) compiler. Also, even older OS/2 versions, including **Warp 3.0**, **Warp Connect** and **Warp Server** are now fully able to support Java.

But the great work does not end with that: you can expect a steady stream of new revisions and updates over the next months. **IBM** and **Lotus** have both publicly stated that they will make Java a key technology for their mainstream product line and that they will focus on business solutions for the internet.

As a result, we now have **VisualAge for Java** and **VisualAge for e-business** as important additions to IBM's largely successful VisualAge family of multi-platform development tools. And Lotus has really taken the lead on the internet with its new Web-centered **Notes** and **Domino** technologies. Also, IBM is actively encouraging and helping developers and customers rapidly migrate their applications to Java.

On the LAN front meanwhile, **OS/2 Warp Server** is doing very well. Industry analyst Dataquest forecasts a strong growth For OS/2 Warp Server in the next years. Which is not unlogical, since this stable server now offers the best **Windows 95** and **Windows NT client support** one can imagine.

OS/2 Warp is the ideal operating system solution for today's networked world, offering an open business platform for heterogeneous environments. It delivers today on the promise of network computing with Internet/intranet connectivity, dependable systems management, ease of use, scalability and support for that hot new Java technology.

Backup Software

ARCsolo for OS/2

By Cheyenne Software

ARCsolo for OS/2 offers reliable backup and restore to OS/2 workstations and LAN Server servers. This stand-alone application offers powerful storage management tools, which include features such as Intelligent Restore and the File Tracking System, as well as a variety of logs and reports. ARCsolo for OS/2 combines an object-oriented drag and drop interface for ease-of use, and a multi-threaded device engine for maximum performance.

ARCsolo V1.7 for OS/2

ADSM/2

By IBM

ADSTAR Distributed Storage Manager/2 (ADSM/2) provides businesses with a recovery and storage management solution that manages network storage and protects valuable data found on diverse Intel-based, Unix based and Macintosh platforms.

The process of backing up hundreds of workstations and file servers is labor intensive, time consuming, and costly. With IBM's ADSM/2, businesses have a

storage management solution for their enterprise that helps reduce labor costs, protects hardware and software investments, and helps manage storage costs.

BackAgain/2

By Computer Data Strategies

Supports any device supported as nameable drive, including SCSI tape drives, Bernoulli Boxes, Syquest removable hard drives, diskettes, etc. Will support EA's, HPFS, HPFS386, and long file names. Ease of use and powerful capabilities go hand-in-hand with Back Again/2 Professional. Featuring an attractive point and click interface modeled after the OS/2 'drives object', Back Again/2 Professional also features a built-in scheduler, password protection, and multiple levels of data compression.

Attachmate Extra

By Attachmate

EXTRA! for OS/2 v2.0 is a object-orientated, 3270 emulator designed for OS/2. Integrated APPN and 3270 engines allow multiple concurrent APPC/CPI-C, LUA, SDLC, DFT, DLC (802.2), IPX/SPX, and NetBIOS sessions.

ATT10
Attachmate Extra! for OS/2

CallerID/2

By Rhintek Incorporated

CallerID/2 sits in the background of OS/2 and promptly identifies incoming callers. Based on the powerful RhinoCom engine, CallerID/2 uses custom popup messages, hang ups on certain numbers or call-types, or even multimedia sounds associated with each call to efficiently handle your calls.

RNE35
CallerID/2

CapWatch

By Creative Assistance Software

Provides the LAN Server administrator with easy tracking of utilization against the configured capacity limits from anywhere on the network. Capwatch gives configurable alarms and alerts to help administrators in monitoring usage and anticipated over-utilization. Requires LAN Server 3.0, 3.01 or 4.0

BMTCAP
CapWatch V1.0 for OS/2

cc: Mail

By Lotus Development

Communications are the lifeblood of all companies. With cc: Mail you can connect 5 people in a single office or 10,000 people globally. Start with a platform package for each operating system on your network and then add as many user packs as you need. If you connect to remote locations you also need a router.

COMi

By OS Tools

COMi, a multi-port asynchronous serial device driver, supports up to 99 serial devices. COMi supports shared interrupts on ISA machines with specific serial adapters. It supports standard UARTs and baud rates to 460.8 kbps.

OST20
Comi

Communications Server

By IBM

The IBM Communications Server for OS/2 Warp, Version 4 (Communications Server) provides industrial strength OS/2 communications by combining the versatile multiprotocol support of AnyNet/2, with the power of Communications Manager/2. The Communications Server has these features:

- * Capacity to grow: Supports up to 2000 clients and more than 20,000 simultaneous host sessions
- * Multiprotocol Support
- * Robust 32-bit API's
- * Connectivity Enhancements
- * CPI-C 2.0 Enhancements
- * A wide range of LAN and WAN connectivity options

Internet Server

By **IBM**

With IBM's Internet Connection Server you have a solid foundation for your presence on the Net. You can use the Internet Connection Server on your international enterprise network to distribute sales manuals, employee handbooks or other documents that need wide distribution and/or frequent updates. This IBM Software Server is available in OS/2, Windows, NT and AIX versions.

64H1364

Internet Conn. Server for OS/2 Warp

ISDN PM

ISDN PM has been designed as a supplement or an alternative to SLIPPM (IAK) or SLIP (TCP/IP, Version 2.0). It offers the possibility of an internet connection via the telephone which is not only faster than a modem connection but which takes advantage of the digital data transfer of ISDN (64 kbits/s). It is also possible to bundle two ISDN-channels to achieve a transferrate that is even higher (up to 128 kbit/s). Furthermore you can share your ISDN line on your LAN to give every LAN-user Internet Access (using masquerading) to let them use mail, www and ftp. Combined with the possibility of using DOD (Dial-on-Demand) this is a very powerful solution for small offices and/or LANs!

LinkWiz

By PCX

LinkWiz is a standalone software utility that allows users to transfer data between similar operating systems at speeds up to 15Mb per minute! LinkWiz will detect your port and automatically adjust transfer speed to achieve the fastest and most accurate transfer rate possible. Serial and parallel cables included.

PCX25

LinkWiz V2.3 for DOS, WIN, and OS/2

Managet

By Client Server Networking

Managet assists the LAN administrator in tuning IBM LAN Servers. Statistics are collected about resource and user activity. Graphs direct you to the detail information needed to improve performance and expand capacity.

CSN60

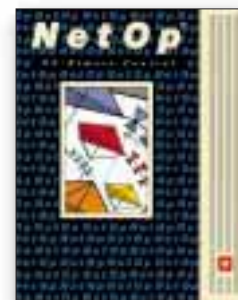

MANAGEIT V1.0

NetOpPM

By Danware Data A/S

NetOpPM is a full-blown Presentation Manager application, which from an OS/2 PC will allow you to take control of any OS/2, DOS, Windows or Windows NT PC on your LAN or WAN. NetOp PM's intuitive graphical interface with pull-down menus and toolbar buttons makes the program extremely easy to use. Multiple platforms are supported: You can control OS/2, Windows and DOS PC's using the NetBIOS and/or Novell's IPX/SPX interface, and all this simultaneously!

Complete OS/2 Support: NetOpPM lets you control PC's running OS/2 PM, Seamless Windows, OS/2 Window, OS/2 Full Screen, and DOS - windowed or full-screen. Taking full advantage of OS/2's multi-threaded features, NetOpPM gives you the ultimate in OS/2 remote control. Call for multi-user licenses. The new version 5.3 fully supports Windows NT 4.0.

IBM TCP/IP v2.0

By IBM

Now that the Internet has become a household word, TCP/IP has taken on a much larger significance than ever before. TCP/IP is actually a family of related protocols designed to transfer information across a network and provide information about the network. Enables users to send mail messages, share files and access remote applications across both LANs and WANs.

The beauty of TCP/IP is it allows communication to be seamless between the wide range of computers and operating systems used on the internet. Unix, VAX, VMS, Macintosh, Intel based PCs and others can all talk to each other.

Database Server

NEW

By IBM

The IBM Database Server for the OS/2 Warp is part of IBM's family of modular application servers — IBM Software Servers. These servers enable you to rapidly implement client/server applications, using modular server technology that supports multiple server and client platforms. With award-winning DB2 database technology, the Database Servers provide management and access to data stored locally or in remote systems. Access to data through the WWW is provided. This full-functioned SQL relational database system is designed to manage data for the individual, the workgroup, and for company-wide solutions needed in today's business world. OS/2, AIX and NT versions available.

System Performance Monitor/2

By IBM

Integrated package of powerful facilities from IBM allows you to monitor resources such as CPU, RAM, disk, and more on your local and remote IBM OS/2 2.x workstations and servers. SPM/2 can display "live" resource utilization, or record comprehensive data in log files, from which you can produce detailed reports profiling system performance.

52G8220
SPM/2 2.0

VisualAge C++

By IBM

VisualAge C++ brings several new technologies into the C++ marketplace. First, by integrating a visual application builder and visual data access builder into a C++ programming environment, true "visual construction from parts" is possible. This means much faster application building and much shorter training time for developers who need the scalability of C++, but who do not have extensive C++ backgrounds. Second, VisualAge C++ v3 features all the components of a professional C++ programming environment including a 32-bit compiler, integrated development environment and powerful tools. Finally, development with VisualAge C++ v3 is based on IBM Open Class - a complete set of C++ class libraries designed to make developers more productive and to shield them from underlying operating system API's.

VisualAge for Basic NEW

By IBM

IBM VisualAge for Basic delivers a powerful suite of application development tools built around an advanced implementation of the BASIC programming language. VisualAge for Basic is for the developer creating GUI clients and for the DB2 application programmer who wants to use BASIC to create GUI clients, DB2 stored procedures, and DB2 user-defined functions.

Using the BASIC language, you can build cross-platform client/server applications. Applications can be built using objects from different object models and can operate across a variety of operating systems. VisualAge for Basic client support is available on OS/2, Windows NT+, and Windows 95+. DB2 Server support is available on OS/2, AIX, and Windows NT.

64H2433

VisualAge for Basic OS/2 Windows

VisualAge for Cobol

By IBM

Provides the COBOL programmer with 32-bit direct-to-SOM based, object oriented support for OS/2. Designed specifically to handle client/server applications using visual development. It also gives the COBOL programmer a set of high productivity, OS/2 based power tools: IBM SMART data utilities, direct access to data, local and remote DB2 and CICS data access, Visual GUI designer, Workframe/2, LPEX editor, Interactive debug tool, performance tuning and more.

28H2177

VisPro Basic for MS Windows NEW

By Hockware

Now, Visual Basic programmers can take advantage of the same VisPro family productivity that REXX, C and C++ programmers have enjoyed for years. Fully integrated into the Visual Basic 4.0 environment, VisPro for Visual Basic helps you create Visual Basic programs faster than you ever thought possible. Drag and drop programming provides a faster and easier way to create code. Simply drag a control to a Visual Basic Code window and a list of all the methods and properties for that object appears in the VisPro Code Wizard.

VAST Standard OS/2

62H8180

VAST Professional OS/2

VisualAge for Java NEW

By IBM

Using Visual Age for Java, developers can create GUI Web-based Java applets or standalone applications that access a variety of IBM products, including DB2, IMS, CICS, MQ, and SOM. By using a suite of visual builders, complete programs can be created without writing source code. Also included with Visual Age for Java is a complete development environment, including an editor, debugger and browser, along with a Java class library and a VisualAge Data Access builder for visually constructing data access through use of Java Database Connection (JDBC).

The VisualAge family of software powertools allows developers to construct applications visually by connecting pre-fabricated, reusable software components from an expansive library of pre-defined classes and parts from IBM and other vendors. With the addition of IBM components and tools for Java, developers can increase productivity by rapidly building Java "applets" that extend and interoperate with existing VisualAge for C++, VisualAge for COBOL, VisualAge for Smalltalk and VisualGen applications.

New Internet capabilities also let VisualAge programmers develop client/server applications that have easy-to-use Internet user interfaces. The resulting applications give businesses a competitive edge by providing easy access to data anywhere within the enterprise, better service to target markets and the ability to conduct electronic commerce over the Internet.

Watcom Fortran 77 V11

Disk Compression

Stacker for OS/2 & DOS

By Stac Electronics

Stacker gives you traditional data compression and compatibility between compressed DOS and OS/2 files. Automatically compress all your FAT drives or customize the configuration. Supports Boot Manager and Dual Boot. Defrags and optimizes the performance drives. Provides the compression ratio on your compressed files. Supports up to 2 gigabytes compressed disk capacity on one drive.

STC24

Stacker V4.0 for OS/2 and DOS

ZipStream

By Carbon Based Software

Simplicity, Safety, Speed, and Reliability, as well as a newly designed GUI interface are just five of the features that make this program so appealing. ZipStream, is an exciting new concept in automatic, transparent file compression and decompression utilities. ZipStream is completely file-based rather than disk-based, giving you complete control of which files are compressed and/or encrypted. Regular, compressed, and/or encrypted files can reside on the same drive. No reformatting is required and no container files are used making for one of the most reliable encryption and/or compression schemes available anywhere.

CBS40

ZipStream V1.2

Avarice

By Stardock Systems

Take a voyage to OS/2's first virtual reality game. The real-time adventure game where you must solve mysteries, meet interesting people and oh, save the world while you're at it. Supports OS/2 3.0 or higher.

SDS55

Avarice - The Final Saga

Trials of Battle

NEW

By Stardock

Designed from the ground up to run on a 32bit, multithreaded operating system that is either stand alone or connected to a network (either on a LAN or by modem), Trials of Battle promises to do for the action game genre that Galactic Civilizations did for the strategy game genre. Set on a distant world, you command the latest in armored technology! You pilot your hover tank across the surface of various arenas in an effort to destroy all those that oppose you. Between rounds, you can repair your battered hover tank, add new weapons, new shields, etc. and then enter a new arena with tougher obstacles, deadlier enemies, and dangerous unknowns.

SpellGuard

By 2 Rud Software

SpellGuard is a multithreaded spell checker which takes very little CPU and has comprehensive help. It also includes a dictionary maintenance program and a program that allows you to add a file of words to the dictionary. If you're online, you need this program!

RUD10

SpellGuard V1.1 3.5

StarOffice

By Star Division

A clone of MS Office! StarOffice gives you a multi-lingual and multi-platform CD-ROM with a complete Office Suite. This includes StarWriter, StarCalc, StarChart and more. Version 4 is expected in the summer of 1997.

STAROFFICE

StarOffice w/14k4 modem

STAROFFICE4

StarOffice version 4

Transaction Server

By IBM

Upgrade now from CICS for OS/2 to the IBM Transaction Server. OS/2, DOS, AIX, Windows, OS/400, VSE and MVS Clients and OS/2, AIX and NT Servers.

33H2061

Transaction Server for OS/2 UK CD

Voice Enhancements

By IBM

Voice Type for OS/2 Warp Enhancement strengthens the VoiceType included in OS/2 Warp Version 4. This enhancement gives professionals who dictate the ability to delay correcting their dictation.

84H4717

Voice Enhancements by IBM

WordPro/Freelance

Graphics

By Lotus

WordPro for OS/2 Warp - A full-featured word processor that provides Internet publishing, collaboration capabilities with TeamReview, TeamConsolidate and Versioning, rapid professional document creation with Smart-Masters, organization with Divider Tabs, the ability to spell check and edit a document simultaneously, and a personalized help system, Ask the Expert. Freelance Graphics for OS/2 Warp - A powerful presentation graphics program with a start-to-finish process that allows users to develop plans, reports and proposals that can also be used as presentations. Include team-computing features: TeamReview, TeamConsolidate and Versioning.

818H2E

WordPro/FreeLance for OS/2 UK CD

Programmer's Editors

The BOXER Text Editor

By Boxer Software

The BOXER Text Editor is an affordable, yet powerful and easy to use character mode text editor for OS/2. This 32-bit application takes full advantage of OS/2's advanced features such as virtual memory and long file names under HPFS. BOXER's powerful feature set includes things usually found only in editors twice the price or more. BOXER is fully configurable with many built-in emulations such as Brief, EPM, QEdit, WordStar, Norton, etc. Includes DOS version.

BOX10

The BOXER Text Editor V7.0

IPF Editor

By Perez Computing Services

Create Hypertext documents and on-line help easily. Import from word processors, create IPF tables from Lotus and Microsoft spreadsheets, and add multimedia music and voice support to your on-line documents. Note: requires the IPFC compiler included IBM's Developer's Toolkit.

PCC85

IPF Editor V2.0

Preditor/2

By Compuware

Rapidly perform searches and scrolls at rates unheard of with the previous generation of GUI editors. PREDITOR/2 handles very large files without arbitrary limits of buffer size, number of open buffers, etc. and it's equipped with it's own C-like extension language, compiler and on-line debugger.

COM79

PREDITOR/2 V3.0

Qedit/Semware Editor Jr.

By Semware Corporation

Whether you are just beginning to use a text editor or you're a programmer who demands a high performance, thoroughly professional package, Semware is for you. Includes the DOS version.

SEM60

The Semware Editor Junior for OS/2

RimStar Programmers

Editor

By RimStar Technology

Lets you edit text at lightning speeds. Its feature set will increase your productivity with multiple file editing, unlimited undo and redo capabilities, C macro language and on-line help. RimStar's Source Browser eliminates annoying searches for functions and variable definitions, and references with a convenient 'jump to' feature.

RIM20

RimStar Programmers Editor V2.1

Visual SlickEdit for OS/2

By MicroEdge

Visual SlickEdit v2.0 gives you more features, more speed, and more power. Simply put, its everything you need to make your development more efficient and more productive. This award-winning programmer's editor has been upgraded with new features and a new look that will save time, increase automation and reduce coding errors.

MED21

Visual SlickEdit V2.0 for OS/2

SPF/PC for DOS & OS/2

By Command Technology

SPF/PC v4.0 for DOS and OS/2 provides downsizing solutions for mainframe MVS programmers facing the challenges of developing in a PC environment. Features full 3270 compatibility, Enhanced REXX support, Modifiable Colorization, 132-column support, SUPERC File Comparison, Horizontal/Vertical Splits, and COBOL Workbench integration.

CTC80

SPF/PC V4 DOS OS/2

REXX Programming Tools

dbfREXX

By dSoft Development

dbfREXX is a dynamic link library (DLL) that provides simple, affordable database management from your OS/2 REXX programs. It makes accessing dBase files easier than anything you've imagined with functions immediately available through REXX for creating, reading and writing dBase files.

DSF26

dbfREXX V3.0 3.5

REXX SuperSet/2

By SoftTouch Systems, Inc.

Supercharge your REXX programs today with this set of seven DLLs containing over 300 functions that will make your REXX programming environment even more powerful. It includes an extensive reference guide with over 600 pages of detailed documentation for every function.

GTU65

REXX SuperSet/2

GTU70

REXX SuperSet/2 Pro

GpfREXX

By Gpf Systems, Inc.

From the leading Interface Builder company Gpf systems, you can now work with REXX code. Using GpfREXX will give you, apart from a superb Interface Builder, the option to generate C or C++ code from the same GUI design by acquiring Gpf V2.1 or Gpf 2.0 Single Platform. Easy to design multi-threaded applications. Includes source-code debugger. Supports all CUA'91 and Multimedia Controls. Point and click to integrate DB2/2 databases.

GPFRXX
GpfREXX

RexxBASE

By American Coders

RexxBASE provides a REXX interface to dBase III and IV files - DBF, DBT, NDX and MDX formats.

ACD53
RexxBASE V2.2

REXX BOS

By Logisoft AR Ltd.

The complete REXX OS/2 interface. It supports almost all OS/2 Control Program, VIO, mouse and keyboard APIs. Additionally it introduces many high level functions like scheduler, extensive CGI support for web servers, ASCII INI file support, directory manipulation etc. This comprehensive product comes with detailed online reference equivalent to 400+ pages of guidance and reference information. Each function has at least one complete example of usage. This library is very consistent in naming conventions, parameter passing mechanism and return codes. It comes with free technical support via e-mail.

LG110
REXX BOS v2

REXXLIB

By Quercus Systems

REXXLIB includes over 150 REXX extension functions for compound variable handling, interprocess communications, mathematics, system services and text-mode user interfacing. It also includes date format conversion. No runtime fees.

QR90
REXXLIB v1.0 for OS/2

REXXTERM

By Quercus Systems

Advanced programmable asynchronous communications for DOS and OS/2 made easier.

QR85
REXXTERM V2.3 for DOS and OS/2

Surf 'n' REXX

By Innoval

Use REXX, VXREXX, and VisPro REXX to build powerful internet utilities. Surf 'n' REXX provides the DLLs to help you make your own webcrawler, send email from the command line, put and get across the net, and more!

IN050
Surf n REXX V1.0 3.5

VisPro/Reports

By Hockware

VisPro Reports is the first and only REXX enabled report writer for VisPro/REXX, VX REXX and OS/2 REXX. It allows you to print attractive reports including invoices, form letters, personnel reports, financial reports, and more. A wide variety of Avery(tm) labels are supported allowing you to print address and other labels easily. A CUA'91 style WYSIWYG report designer makes it easy to include

business graphics, photographs, calculated fields, multi-line text, lines and other cosmetic shapes.

HCK30
VisPro/Reports

VisPro/REXX

By HockWare

Professional, drag and drop visual programming tool for OS/2 2.X GUI development. Includes all CUA '91 objects plus 3-D business graphics and multimedia, full Workplace Shell integration, multiple thread and semaphore support; multiple development views, SOM-based object builder, and provides standalone, royalty-free executable. Supports DB2, Watcom SQL, and VXREXX conversion utility. LAN version available.

HCK50
VisPro/REXX Data Entry Object Pk v1

HCK70
VisPro/REXX Bronze V3.01

HCK80
VisPro/REXX Gold v3.1

VX-REXX

By Watcom International Corporation

Watcom VX-REXX is a visual development environment for creating OS/2 applications. Combines a project management facility, visual designer and an interactive source-level debugger to deliver an approachable and productive visual development environment. VX-REXX Client/Server provides powerful connection, query and chart objects for accessing several databases, manipulating data and charting the results.

Utilities & Tools

4OS2 with 4DOS

NEW

By JP Software

Enhanced replacements for the default CMD.EXE and COMMAND.COM shells, including: full command history, aliases and over 50 new commands and dozen of new batch file features. Use both for a consistent interface in OS/2 and DOS.

JPS11

4OS2 W/ 4DOS v2.0/5.0

Archive Manager

By VacNat

32-bit, multi-threaded PM front end for PKZip, InfoZIP, LH and LH32 OS/2 archive programs, which allows for the easy creation and maintenance of archive files. You can drag files into or out of archives, from one archive to another, and more.

VAC38

Archive Manager v2.2

ATS for OS/2

By MHR Software

Build complete job streams, giving complete control of how and when to run each program. Define an unlimited number of tasks, dependencies, and holidays. ATS logs all activity to the disk and windows for Log, Status, and Running Tasks.

MHR20

ATS v3.0

Batch Manager

By M. Bryce & Associates

Batch Manager for OS/2 lets you manage a delayed execution job queue via an OS/2 PM program. It's ideal for any batch process, including backing-up files, producing routine reports, and downloading data from mainframes.

MBA49

Batch Manager v3

OS/2 Programmer's Sidekick

By Murray

A quick reference that covers 800 of OS/2 Warp's API functions, as well as structures, macros, and other useful programming info.

QTR10

OS/2 Programmers Sidekick

Blanker

NEW

By BMT Micro

Screen Blanker is an easy to use utility to save your screen from damage. You can change the blank time and select blanking actions in the Settings dialog.

BMT30

Blanker

File Commander/2

NEW

By BMT Micro

File Commander/2 is a 32 bit OS/2 text mode file manager and shell that allows you to locate, copy, move, delete, view, edit and execute your files in a quick, convenient, and customizable manner.

BMTFC2

File Commander/2

File Manager/2

NEW

By BMT Micro

File Manager/2 is a shareware 32-bit OS/2 Presentation Manager file, directory, and archive manager which you can use to manage all your file system objects.

It is recognized by many as far and away the best graphically oriented file manager in existence on any platform today, and won the 1995 OS/2 Magazine Editor's Choice Award.

BMTFM2

File Manager/2

Chron

By Hilbert Computing

Chron is a 32-bit utility to start programs or display textual reminders at any given time. These program or reminder events can be automatically rescheduled to execute hourly, daily, on weekdays, weekly, every two weeks, monthly or yearly. An unlimited number of events can be scheduled.

HIL45

Chron v4.0

Workplace Commander

By EDSG

A 32-bit PM program ideal for handling files, directories and archives. It functionally covers all aspects of the Norton Commander for DOS but offers many additional functions especially for OS/2.

COMMAND

Workplace Commander for OS/2 UK

Conversion Assistant

NEW

By Snow Storm Software

Units conversion system designed by/for Engineers and Scientists. Utilizes dimensional analysis to provide over 50 million unit conversions and over 75 different unit types using minimal system resources. Use the intuitive interface to select physical quantity, dimensional formulae to/from, and more. Includes online help and clipboard support.

SN030

Conversion Assistant V1 3.5

CopyShop/2

By Trafalgar

CopyShop couples traditional photocopier functions with unique features such as Mirror Image, Negative Image and Image Enhancement Algorithms. Fax a scanned document without entering your word processing program. Copy two-sided originals, or create sets of collated copies. Includes native OS/2 scanner drivers to let you run your Windows scanner programs in Win-OS/2 sessions.

TBS40

CopyShop/2

CPU Monitor Plus

By Bon Ami Software

CPU Monitor Plus displays real-time CPU performance and RAM utilization data for all processes and threads.

Detect and stop invisible, runaway and background programs. Suspend threads and dynamically change priorities for all your PM applications.

OS/2 2.x users can display real-time RAM utilization data including memory in-use, allocated, ratios, and much more.

BAS17

CPU Monitor Plus

Ctrl-Alt-Del Commander

By Perez Computing Services

Prevents accidental rebooting of OS/2. It also lets you stop programs that have locked up the Workplace Shell, working when Ctrl-Escape doesn't or restart a frozen WPS without stopping active applications. When activated it displays vital information about active applications and permits the alteration of their relative priorities.

PCC91

Ctrl-Alt-Del Commander V2 3.5

Desktop Commander

By Pinnacle Technology

Desktop Commander allows an administrator to take a snapshot of an ideal workstation for a group workers, apply restrictions, store it centrally, and associate the desktop with LAN user ids.

PIN70

DeskTop Commander for OS/2

DeskMan/2

By Development Technologies

Backup and restore your Workplace Shell objects, share WPS objects with other users, migrate objects between desktops, create an icon library, and much more. Set up personalized and standardized desktops that can be accessed from any workstation. Remotely installable and configurable, Deskman/2 is an indispensable tool for both LAN administrators and single users.

DEV60

DeskMan/2 v2

DEV65

DeskMan/2 v2 UG

Desktop Observatory

By Pinnacle Technology

Build an instant Desktop in seconds, or perform maintenance on client Desktops from any machine on your network. Password protected folders, setup mobile desktops and security, or standardize an entire network. Apply restriction settings to objects. Great for selective backups, statistics or copying files from the server ... and more.

PIN55

Desktop Observatory v5

Disk Jockey

NEW

By Clear & Simple

Efficiently find, catalog, move, delete, copy, zip and rename files. View text, image, sound and video files. Save wasted space with a Drive Clean-Up. Quick format diskettes, make directories and more.

CLS10

DiskJockey

DriveCopy

NEW

By PowerQuest

There was a time when upgrading to a new hard drive meant hours of downloading data, applications, and operating systems to disk; then hours more of reinstalling everything to your new hard drive. If it all went well, you could be looking at a few days worth of work. Of course, there was always the risk of scrambling your data or losing it altogether in the process. Fortunately, now there's DriveCopy. With a few simple steps everything from your old hard drive is automatically copied to your new one without losing a single preference, setting, or byte of data. No re-installing, no data loss, no headaches.

PWQ70

DriveCopy

Escape

By Snowstorm Software

Escape GL now has unlimited 3D model support utilizing the very popular 3D Virtual Reality Modelling Language (VRML). Support for VRML models includes all graphical primitives, directional, point and spot lighting, multiple lights, perspective cameras, smooth lighting and shading, multiple quality settings, full material coloring, and multiple axis animation. Now fully compliant VRML 1.0 models may be viewed and animated as a screen saver for Warp 4.0 systems. Hundreds of models are available on the Web in many areas of interest.

Traveling Workplace V1.20 3.5

UniMaint

By Softouch Systems, Inc.

With Unimaint you can boot OS/2 faster, or clean up precious hard disk space by totally uninstalling OS/2 programs you've installed and no longer use. It includes uninstaller, which helps maintain INI files,

and a desktop backup and portability tool that allows complete backup and transfer of customized desktops from one machine to another.

UniMaint V5.0 3.5

Unite CD-Maker

By Cirrus Technology

Create ISO 9660 standard CDs that can be read by virtually any OS/2, Windows or DOS system. Its multi-threaded design and drag-and-drop features speed and simplify CD creation. Device drivers are included to write to and from many popular CD-recordables.

CIR23

Unite CD Maker v3

Voice Pilot

By Voice Pilot Technologies

With Voice Pilot for VoiceType Dictation-equipped computers, you can review your calendar, make a to-do list and more—all using your voice. Voice Pilot is voice aware, not just voice enabled. This means you give your computer commands in real English rather than using your voice to push buttons and arrows designed for a mouse.

X-File

By Code Smith

X-File, "The Open File Dialog Fixer", is a desktop enhancer which adds major enhancements to the standard OS/2 microscopic "open/save as" file dialog. Nothing paranormal here - just real useful stuff.

X-File runs under OS/2 3.0 or later, is small and non-intrusive, and will save you from merrily-we-scroll-along syndrome. Works with many apps such as System Editor and Enhanced Editor.

XFILE

X-File

X-it

By CodeSmith

X-it, "The One Button Zapper", is a desktop enhancer which adds major enhancements to the hitherto barren OS/2 title bar (Warp 4.x, 3.x or OS/2 2.x) X-it (pronounced "exit") provides a one button click to many desktop operations, such as closing a window, displaying a task list, VIO, single and multiline edit field cut-and-paste, and a unique title bar roll-up function. Functions are accessible from buttons on the titlebars, middle or right mouse buttons, or the keyboard. And there's X-it's complete customisability, even down to changing items on the popup menus, and the title bar bitmaps as well. Create and use your own bitmaps if you want.

BMTXIT

X-it v2.4

X-L Keyboard

By Exceller Software

Turn any OS/2 application into a multilingual powerhouse with X-L Keyboard. Remap your keyboard into 10 different predefined layouts or just add the characters you need. Great for word processing in foreign languages, and for chemistry or math symbols; more than fifty symbols are included.

EXC50

X-L Keyboard Mapper v1.0

Xtra Xtra

By Sublime Software

Xtra! Xtra! is software that produces a personalized newspaper on demand. Xtra! Xtra! goes online and finds news information based on your preferences, retrieves, formats then prints your own personalized newspaper — automatically.

SUB10

Xtra! Xtra! for OS/2 3.5

Zip Control

By RPF Software

Zip Control provides "point-and-click" access to Zipped archive files, both for viewing and creating. Zip Control supports password encryption, viewing and printing of embedded files, drag and drop, configurable virus scanner support, "checkout" files for evaluation/installation, extraction of selected or all files and a search of one or more drives for all zip files.

RPF10

RPF Zip Control V2.2.8

ZIPMAN

By Software Builders

ZIPMAN is a full featured OS/2 interface to PKZip/PKUnZip & PKUnzip. It allows users to point and click, and drop and drag to compress, decompress and backup files using PKZip and PKUnzip.

More Books!

We have more titles available than we can list here. Call us for more information or check out www.xeu.com/blueware/ now!

Software Registration Service

More and more software will be electronically distributed – on CD-ROM or via the Internet. It may save you money, because you don't have to pay for packaging, printed documentation and transport. Also, you will often have the chance to use software on a shareware-basis and to try before you buy.

■ We are proud to announce our new Registration Service which enables you to obtain the required licenses to electronically distributed software easily.

The OS/2 Warp Catalogue

We now offer the complete range of titles from BMT Micro. You can download the software directly from www.bmtmicro.com.

Thereafter, you can purchase a full license directly from us. It's just as easy as buying other software from us. As an alternative to downloading the often large files, we also offer the new OS/2 shareware CD-ROM from BMT Micro.

The BMT Micro CD-ROM

This CD features all the best of the best OS/2 shareware from BMT Micro: over 150 of the very finest OS/2 programs.

The CD contains all the programs on this page, and more! Each program on the CD can be registered with us and you can receive the registration information delivered directly to you (by e-mail) soon after placing your order. In addition to being separated into categories, each program has been unarchived allowing many of the programs to be run or installed directly from the disc. Even the programs that do not lend themselves to direct installation from the disc have been unzipped allowing the user to browse the various readme files, help files, etc. Each directory has a descriptive text file that lists filenames and a brief description of the files. We truly believe you will find that having such a large collection of the very best OS/2 shareware at your fingertips a valuable resource.
