Programming Language C

Action Replay / Recapitulation / Repetition
last lesson learned

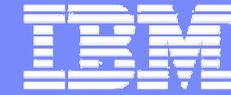

The Method of Traffic Lights

- You have to answer some questions shown on the following slides.
- These are multiple choice questions, answers are named green, yellow or red.
- Read the question carefully and listen to the lecturer / teacher.
- Think of an answer and prepare your card(s). Don't look at your neighbor.
- Raise your prepared card.

Agenda

- Part I: Nassi-Shneiderman-Diagrams
- Part II: Programming Tools

IBM University and Vocational Education

Part I: Nassi-Shneiderman-Diagrams

some questions, please answer

Nassi-Shneiderman-Diagrams

- The order in which commands are executed is named

green	control flow
yellow	control structure
red	diagram

In this case only one answer is correct.

Nassi-Shneiderman-Diagrams

- Directives that have influence on the control flow are

green control structures

yellow constants

red keywords

Not only one answer can be correct.

Nassi-Shneiderman-Diagrams

- Why do we use Nassi-Shneiderman-Diagrams?

green for structured programming

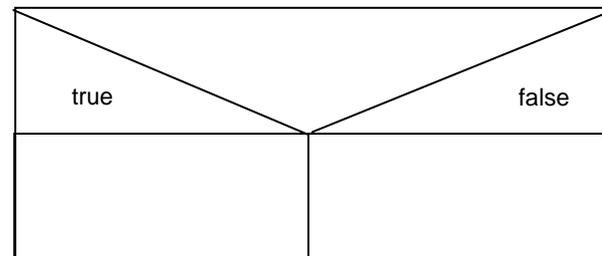

yellow to have more work

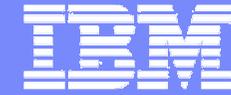

red only for having a chapter for the exam

Nassi-Shneiderman-Diagrams

- What is this figure called (see below)

green iteration
yellow selection
red block

IBM University and Vocational Education

Part II: Programming Tools

some questions, please answer

Programming Tools

- Which part generates executable machine code

green preprocessor

yellow compiler

red linker

Programming Tools

- Which order is correct?

green	preprocessor, linker, compiler
yellow	linker, compiler, preprocessor
red	preprocessor, compiler, linker
